EDUCATION

Columbia University

Master of Science in Artificial Intelligence; Concentration: AI Infrastructure

August 2026 – Dec 2027

New York City, NY

University of South Florida

Bachelor of Science in Computer Science; Minor: Entrepreneurship

August 2022 – May 2026

Tampa, FL

Relevant Coursework: Data Structures & Algorithms, Advanced OOP in C++, Software Engineering, Secure Coding

Recognition: USF Green and Gold Directors Award, Annette L. Raymund Endowed Scholarship, CS Foundation Scholarship, Engineering Annual Fund Scholarship

EXPERIENCE

Student Assistant - Digital Initiatives

University of South Florida Libraries

Aug 2024 – May 2026

Tampa, FL

- Reduced manual review time by **70%** by building tools to validate Excel records against USF Digital Commons images
- Improved retrieval for **1,000+ digital items** by standardizing metadata and identifying cataloging errors

Machine Learning Engineer Intern

Finds, Inc.

Oct 2025 – Jan 2026

Remote

- Integrated in-house ML models into backend services for reliable internal inference workflows
- Designed **PostgreSQL** schemas and metadata validation pipelines to improve image-data retrieval

Undergraduate Research Assistant

RARE Lab, University of South Florida — Supervisor: Dr. Zhao Han

Feb 2025 – Jul 2025

Tampa, FL

- Analyzed human-robot interaction study data to support research evaluation and experiment reporting
- Built Android research software integrating **Gemini AI**, Google Cloud SDK, and structured workflows

App Developer Intern

Coefficient Software Systems Pvt Ltd.

May 2022 – Jul 2022

Mumbai, India

- Built product benchmarking datasets by profiling **500+ universities** across US, UK, and Australian markets
- Improved app usability for **100,000+ downloads** by refining UI flows and supporting production updates

PROJECTS

Polaris | *GitHub App, Gemini Agents, FastAPI, Next.js, PostgreSQL* | polaris-livid-one.vercel.app

- Built a GitHub App that scans IaC pull requests and posts security findings in under **120 seconds**
- Designed Gemini agent workflows to map risks to CIS/SOC 2 controls and verify patches before approval

CarbonCTRL | *React, Node.js, MongoDB, Gemini API* | carbonctrl.us

- Built a full-stack emissions platform that converts company inputs into carbon scores and AI-assisted reduction plans
- **Ranked 1st of 70+ projects** at HackaBull 2025 for **Best Use of Gemini API Track**

Adversarial Spam Detection | *Python, PyTorch, BERT, Qwen3-4B, LoRA, Transformers*

- Built an adversarial ML pipeline alternating **BERT** classifier tuning with **Qwen3-4B** spam generation
- Improved spam detection from **91.7% to 95.7%** while maintaining **96.5% accuracy**

LEADERSHIP & OPERATIONS

Head of Logistics | *TEDx at USF*

Jun 2024 – Jan 2025

- Coordinated **10+ volunteers**, event operations, run sheets, and venue logistics for a **100-seat** TEDx program

Vice President | *Students of India Association at USF*

Jan 2024 – May 2024

- Led a **26-member team** and raised **\$15,000** across cultural programming, operations, and stakeholder partnerships

Database Director | *Society of Hispanic Professional Engineers at USF*

Jan 2024 – May 2024

- Organized a **1,500+ file** archive and reduced retrieval time by **40%** through categorization and officer training

TECHNICAL SKILLS

Software Engineering: React, Next.js, TypeScript, JavaScript, C, C++, Java, C#

AI / ML: Python, PyTorch, TensorFlow, Scikit-learn, Transformers, BERT, Qwen, LoRA

Backend & Data: FastAPI, Flask, Node.js, Express, PostgreSQL, MongoDB, SQL, REST APIs

Cloud & Dev Tools: Docker, AWS, Git, GitHub, Vercel, Render, Jupyter, Jira
