EDUCATION

Columbia University <i>Master of Science in Artificial Intelligence; Concentration: AI Infrastructure</i>	August 2026 – May 2028 New York City, NY
University of South Florida <i>Bachelor of Science in Computer Science; Minor: Entrepreneurship</i>	August 2022 – May 2026 Tampa, FL
Relevant Coursework: Data Structures & Algorithms, Advanced OOP in C++, Software Engineering, Automata Theory	
Certifications: Prompt Engineering Specialization (Vanderbilt), Data Analysis (IBM)	

EXPERIENCE

Machine Learning Engineer Intern <i>Finds, Inc.</i>	October 2025 – January 2026 Remote
- Improved model-serving workflows by integrating in-house ML models into backend services for reliable internal inference - Strengthened data processing reliability by designing PostgreSQL schemas and metadata pipelines for faster retrieval	
Undergraduate Research Assistant <i>RARE Lab, University of South Florida — Supervisor: Dr. Zhao Han</i>	February 2025 – July 2025 Tampa, FL
- Supported publishable HRI research by running participant studies and analyzing robot interaction data for HRI 2026 - Built an Android robot app by integrating Gemini AI, Google Cloud SDK, and structured workflows for Misty	
Peer Mentor for Learning Teams <i>University of South Florida College of Engineering — Supervisor: Dr. Mary E. Goodwin</i>	April 2023 – August 2024 Tampa, FL
- Improved Calculus problem-solving for 25+ engineering students through structured drills and algorithmic reasoning - Sustained 100% engagement in EGN 4930 by leading weekly collaborative technical learning sessions	
App Developer Intern <i>Coefficient Software Systems Pvt Ltd.</i>	May 2022 – July 2022 Mumbai, India
- Built product benchmarking datasets by profiling 500+ universities across US, UK, and Australian markets - Improved mobile app usability for 100,000+ downloads while maintaining a 4.4/5 Google Play rating	

PROJECTS

Polaris <i>FastAPI, Next.js, PostgreSQL, GitHub App, Gemini 3 Flash</i> polaris-livid-one.vercel.app
- Built a GitHub App that scans IaC pull requests and posts security findings in under 60 seconds - Designed backend workflows for Terraform, Dockerfiles, Kubernetes YAML, and GitHub Actions analysis - Implemented dual Gemini agents to map risks to CIS/SOC 2 controls and verify patches before commit
Adversarial Spam Detection <i>Python, PyTorch, BERT, Qwen3-4B, LoRA, Transformers</i>
- Built an adversarial training loop alternating BERT classifier tuning with Qwen3-4B spam generation - Improved spam detection from 91.7% to 95.7% across iterations while maintaining 96.5% accuracy - Evaluated classifier robustness against generated attacks using structured model comparison and error analysis
CarbonCTRL <i>React, Node.js, MongoDB, Gemini API</i> carbonctrl.us
- Built a full-stack emissions platform that calculates company CO2 impact and generates AI-driven offset plans - Integrated React dashboards with authentication, Gemini API workflows, and structured user-specific insights Ranked 1st of 70+ projects at HackaBull 2025 for Best Use of Gemini API Track

LEADERSHIP

Head of Logistics <i>TEDx at USF</i>	June 2024 – Jan 2025
Coordinated 10+ volunteers and event operations for a 100-seat TEDx program	
Vice President <i>Students of India Association at USF</i>	Jan 2024 – May 2024
Raised \$15,000 and led a 26-member team across cultural programming and operations	

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript/TypeScript, SQL
Systems & Backend: FastAPI, Flask, PostgreSQL, REST APIs, GitHub Apps, Docker, AWS
Algorithms & Data: Data structures, algorithm design, data pipelines, retrieval systems, metadata processing
ML & Tools: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Git/GitHub, Jupyter, Jira
