EDUCATION

Columbia University New York, NY
Master of Science in Artificial Intelligence; Concentration: AI Infrastructure Aug 2026 - Dec 2027 (Expected)
Coursework: Artificial Intelligence; Natural Language Processing; ML for Signals, Information and Data; Heterogeneous Computing
University of South Florida Tampa, FL
Bachelor of Science in Computer Science, Minor in Entrepreneurship, GPA: 3.71/4.00 Aug 2022 - May 2026
Relevant Courses: Data Structures & Algorithms, Adv. OOP in C++, Computer Architecture, Software Engineering, Secure Coding
Recognition: \$43,000 in scholarships and tuition waivers; AI4ALL Ignite Fellow; MLH Best Use of Gemini API, HackaBull 2025

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C++, C#, HTML, CSS
Backend / Web: FastAPI, Flask, Node.js, Express, REST APIs, React, Next.js, Android SDK, .NET, WinForms
Data / ML: PostgreSQL, MongoDB, pandas, PyTorch, Hugging Face Transformers, scikit-learn, LoRA, model evaluation
Applied AI: LLM APIs, Gemini, agent workflows, Codex, Cursor, Claude Code, GitHub Copilot
Delivery / Testing: Git, Git LFS, GitHub Actions, CI/CD, Docker, Vitest, Vercel, Render

EXPERIENCE

University of South Florida Libraries Tampa, FL
Student Assistant - Digital Initiatives Aug 2024 - May 2026

- Reduced manual review time by ~70% using scrapers to validate spreadsheet metadata against Digital Commons assets
- Standardized 1,000+ digital records by correcting metadata inconsistencies between spreadsheets and repository records

Finds, Inc. Remote
Machine Learning Engineer Intern Oct 2025 - Jan 2026

- Supported app beta testing by deploying in-house ML models through Python and PostgreSQL services
- Built validated product records from approximately 5,000 clothing links using scraping, schemas, and metadata extraction

RARE Lab, University of South Florida Tampa, FL
Undergraduate Research Assistant Feb 2025 - Jul 2025

- Built the complete Android recipe recommendation app and Raspberry Pi backend, implementing UI screens, APIs, and SQLite storage to orchestrate Gemini responses and Misty robot interactions
- Ran participant studies, analyzed behavioral data, and contributed to a human-robot interaction research manuscript

PROJECTS

Polaris | Python, FastAPI, PostgreSQL, Gemini, GitHub App | Live | GitHub

- Built Python/FastAPI backend checks for Terraform, Dockerfiles, Kubernetes manifests, and GitHub Actions
- Added Gemini reasoning and verification agents with mechanical patch checks, audit trails, and developer approval
- Recovered interrupted scans and retried failed GitHub feedback using persistent jobs and a reporting outbox

Adversarial Spam Detection | Python, PyTorch, Transformers, BERT, Qwen3-4B, LoRA | GitHub

- Contributed to BERT evaluation: 98.2% accuracy/0.92 spam F1 vs. SVM 96.6%/0.83 on 762 held-out messages
- Used disjoint splits, a shared loader, and 13 evaluation regression tests in a team BERT/Qwen/LoRA project

PR Nutrition | TypeScript, Node.js, GitHub Actions, Vitest | GitHub | npm

- Published a TypeScript CLI and GitHub Action that flag risky PR changes and show where reviewers should focus
- Kept the analyzer local: Git metadata and file paths only, with no network calls or repository script execution

LEADERSHIP

HealthHacks 2025 Tampa, FL
Hackathon Judge Oct 2025

- Evaluated healthcare prototypes for technical execution, user impact, usability, and product viability

Students of India Association at USF Tampa, FL
Vice President Jan 2024 - May 2024

- Led a 26-member board and secured \$15,000 via fundraising and budget increases for events with 1,500+ total attendees
